PROFESSIONAL SUMMARY

Azure Solutions Architect Expert—certified with hands-on experience in designing secure, scalable cloud solutions on Microsoft Azure. Skilled in cloud architecture, **DevSecOps**, **identity and access management**, and **data analytics**, with practical project experience in **Zero Trust architectures**, **Infrastructure as Code**, and security-focused analytics. Strong foundation in Python, SQL, and enterprise IT systems, with a proven ability to translate technical concepts into business-aligned solutions.

SKILLS & COMPETENCIES

Cloud & Platforms: Microsoft Azure, Azure Portal, Azure CLI, Azure Landing Zones

Cloud & Network Architecture: On-Premises and Cloud-Based Networking, VNets, NSGs, Hybrid Connectivity

Azure Core Services: Virtual Machines, Azure Storage, App Service, Azure Monitor, Log Analytics

Identity & Security: Azure AD, RBAC, Conditional Access, SSO, OAuth, SAML, OIDC, Zero Trust Architecture

Monitoring & Governance: Azure Monitor, Log Analytics Workspaces, Policy Enforcement, Compliance Monitoring

Infrastructure & Automation: Terraform, Docker, Azure Kubernetes Service (AKS), Infrastructure as Code (IaC), CI/CD, GitHub Actions

Monitoring & Observability: Azure Monitor, Log Analytics, Grafana

Data & Analytics: Azure Databricks, Power BI, Tableau

Programming: Python, SQL

Operating Systems: Windows Server, Windows 10/11, Linux (Ubuntu)

Tools & Methodologies: Jira, Azure DevOps, Agile/Scrum

EDUCATION

Lawrence Technological University

Master of Science in Information Technology

Southfield, MI

Aug 2024 – May 2026

University of Mumbai

Bachelor of Engineering in Information Technology

Mumbai, India

Aug 2019 – Jul 2023

EXPERIENCE

Azure Solution Architecture Experience (Project-Based)

Oct 2024 – Present

Academic & Hands-on Cloud Architecture

- Designed and implemented secure, scalable **Azure cloud architectures** aligned with the Azure Well-Architected Framework across multiple projects.
- Built a **Zero Trust DevSecOps** platform and secure web application architecture, integrating **Azure AD**, **RBAC**, and identity-based access controls to enhance security posture.
- Developed a **SOC lakehouse** solution using **Azure Databricks and Power BI**, enabling centralized logging, real-time analytics, and actionable security insights.
- Implemented a **CLI-based Azure landing zone** using **Infrastructure as Code**, establishing governance with RBAC, policies, and standardized resource configurations.

Graduate Research Assistant

Aug 2025 – Present

Lawrence Technological University

Southfield, MI

- Conduct literature reviews by identifying and analyzing academic papers, citations, and dissertations to support ongoing research initiatives.
- Support research in strategic frameworks, including **SWOT** and **SOAR** analysis, for organizational and project-level strategy development.
- Identify and evaluate relevant journals for potential research publication and submission.
- Assist in preparing and organizing research materials for an upcoming publication, including documentation, citation management, and content refinement.

PROJECTS

- Zero Trust DevSecOps Platform on Azure** | [GitHub Repository](#) Feb 2026
- Implemented a secure DevSecOps platform improving deployment security and compliance by integrating CI/CD pipelines with Azure AD, RBAC, and Zero Trust principles.
 - Enhanced network security by configuring VNets, subnets, and NSGs to enable segmented and secure workloads.
 - Deployed containerized applications using Docker and Azure Kubernetes Service (AKS), enhancing scalability and enforcing container security best practices.
- Azure Secure Landing Zone (CLI-Based Architecture)** | [GitHub Repository](#) Dec 2025
- Established a scalable Azure landing zone improving governance and deployment consistency by implementing Infrastructure as Code and standardized resource configurations.
 - Enhanced network security by configuring VNets, subnets, and NSGs to enable segmented and secure workloads.
 - Enforced compliance and access control using RBAC, Azure Policy, and tagging strategies, improving governance across cloud resources.
- Azure Secure Web Application — Zero Trust Architecture** | [GitHub Repository](#) Oct 2024 – Nov 2025
- Improved application security by implementing a Zero Trust architecture using Azure AD, RBAC, and conditional access policies.
 - Reduced unauthorized access risks by implementing identity-based authentication and enforcing least-privilege access controls.
 - Strengthened application resilience by securing network configurations and minimizing attack surface.
- SOC Lakehouse Architecture for Security Analytics** | [GitHub Repository](#) Aug 2025 – Sep 2025
- Built a centralized security analytics platform, enabling real-time threat monitoring using Azure Databricks and Power BI.
 - Improved data visibility by implementing ingestion and processed pipelines to consolidate logs into a unified lakehouse architecture.
 - Delivered actionable insights for security operations through interactive dashboards analyzing threat patterns and trends.

CERTIFICATIONS & PUBLICATIONS

Pooja Borade et. al. Formulating Strategy based on SOAR and SWOT Concepts (Ongoing).

Microsoft Certified: **Azure Fundamentals (AZ-900)**.

Microsoft Certified: **Azure Administrator Associate**.

Microsoft Certified: **Azure Solutions Architect Expert**.

Zscaler Digital Transformation Engineer Certified

LEADERSHIP & MEMBERSHIPS

Club Secretary, San Jose AI Simplifiers Toastmasters Club

Vice President of Education, Santa Clara Entrepreneurs Toastmasters Club

Member, Information Systems Audit and Control Association (ISACA)
